

The background of the slide is a deep space image. It features a bright, glowing light source on the left, possibly a star or a distant galaxy, with a soft, white and blue glow. To the right, there is a colorful, multi-layered ring or nebula with shades of purple, red, orange, and yellow. The entire scene is set against a dark, star-filled background with faint, wispy structures resembling galaxies or nebulae.

The background is a dark, star-filled space. A large, bright white sphere is on the left, partially obscured by a horizontal lens flare. To its right is a smaller, colorful lens flare with concentric rings of purple, red, orange, and yellow. Further right, there are faint, concentric rings of light in shades of blue and grey, resembling a nebula or a distant galaxy. The overall effect is a sense of cosmic depth and light interaction.
